

ENVIRONMENTAL POLICY
UNI EN ISO 14001:2015

In a sustainable development Policy, environmental protection constitutes a primary and constant objective for the company DI QUATTRO S.r.l., which is involved in the continuous improvement of all its activities.

DI QUATTRO S.r.l. is specialized in the design, development and manufacturing of automatic machines systems.

DI QUATTRO S.r.l., during the execution of its activities, manages the environmental issues by pursuing the following objectives:

- Operations in compliance with current environmental legislation, internal regulations and all requirements deriving from contractual agreements concluded with third parties;
- Full attention to pollution prevention;
- Systematic analysis of Environmental Management System, aiming at a continuous performance improvement;
- Environmental issues as main reference to determine company objectives;
- Minimization of each significant environmental impact: the environmental protection in all working places constitutes one of the main company objectives;
- Open dialogue with the general public or involved parties on the environmental effects of the enterprise activities and simultaneous cooperation with public authorities;
- Encouragement of responsibility and sensitivity of employees involved in any business activity, through suitable information and training programs, so that staff at every level ensures an efficient application of Environmental Management System within the scope of each responsibility;
- Priority to relationships with suppliers who can grant products and services consistent with our Environmental Management System;
- Introduction, within the process, of raw and auxiliary materials which have a better environmental compatibility comparing to the ones currently used; early assessment of environmental impacts of new processes and amendments of existing installations;
- Safeguard of superficial and underground water resources, avoiding accidental spills of dangerous substances and waste of energy or other resources;
- Best management of waste produced and enhancement of recycle / reuse whenever is possible.

The Top Management, basing on the directions given by the Management Board, is directly involved in the implementation of these commitments and in the definition of measurable objectives, in order to allow all stakeholders to verify periodically the present Policy, as well as the suitability of resources intended for them.
